About Rig Locator

JuneWarren-Nickle's Energy Group Rig Locator provides detailed information and reports on drilling and service rigs in Canada. Rig Locator data is updated continuously throughout the week. While our staff endeavors to maintain data accuracy, errors in location may occur from time to time. Due to the very dynamic nature of the data, best results are attained by updating this dataset on your Garmin device as frequently as possible. DOWN drilling rigs and service rigs in general are usually sited as where last operating, or somewhere in the general vicinity. While this provides useful status and contact information, the specific location should not be used for navigation purposes without first contacting the contractor. For details, please visit

Back | Image | ↑ | ↓

Remember: Rigs are mobile, particularly service rigs!

where last operating, or somewhere in the general vicinity. While this provides useful status and contact information, the specific location should not be used for navigation purposes without first contacting the contractor. For details, please visit http://www.riglocator.ca/
